

# Vista Health System

## HEAR WHAT OUR EMPLOYEES ARE SAYING ABOUT US!

"At Vista I have witnessed tremendous growth and a team approach to problem solving, which creates a great environment for patients and employees. I am proud to work at Vista and to contribute to help all of us be our best."

*Lisa L., RN, Clinical Nurse Educator, Vista Medical Center – East Campus*

"Departments and people work well together at Vista. If something needs to be done, everyone makes an effort to ensure that the task gets done. There really is a can-do attitude at Vista. You never hear someone say "that's not my department or not my job to do." A perfect example is our point-of-care testing, which requires a multi-department and multi-shift effort to maintain and improve upon."

*Michelle H., Medical Technologist, Vista Medical Center – West Campus*

"When I started with Vista Health System (formerly St. Therese Medical Center) in 1996, I expected the staff to be caring and selfless toward the patients. However, I also discovered that they were caring and selfless toward their co-workers, too. At Vista Health System I feel a real sense of family."

*Ken G., Physical Therapy Supervisor, Vista Surgery & Treatment Center*

"I love working at Vista for several reasons. First of all, you won't find better people to work with. Everyone is caring and dedicated to putting the patient first. Second, something new is always happening, whether it is remodeling a nursing unit or developing a Chest Pain Center of Excellence."

*Vicki C., RN, Quality Coordinator, Vista Medical Center – East Campus*
